HUMAN GENETICS INSTITUTE OF NEW JERSEY**

RESEARCH SEMINAR

**“Regulation of the host-microbiota
relationship”**

Theresa Alenghat VMD, PhD
Department of Immunobiology
Cincinnati Children’s Hospital

Our lab investigates molecular mechanisms that instruct the host-microbiota relationship, and how this level of regulation affects intestinal health, infection, and inflammation. I will present data describing how intestinal microbiota and microbiota-derived metabolites direct epithelial and immune cell homeostasis.

Noon, Monday, April 17, 2023
